

Alexis Lacout

Homme de 38 ans

Gêne respiratoire ...

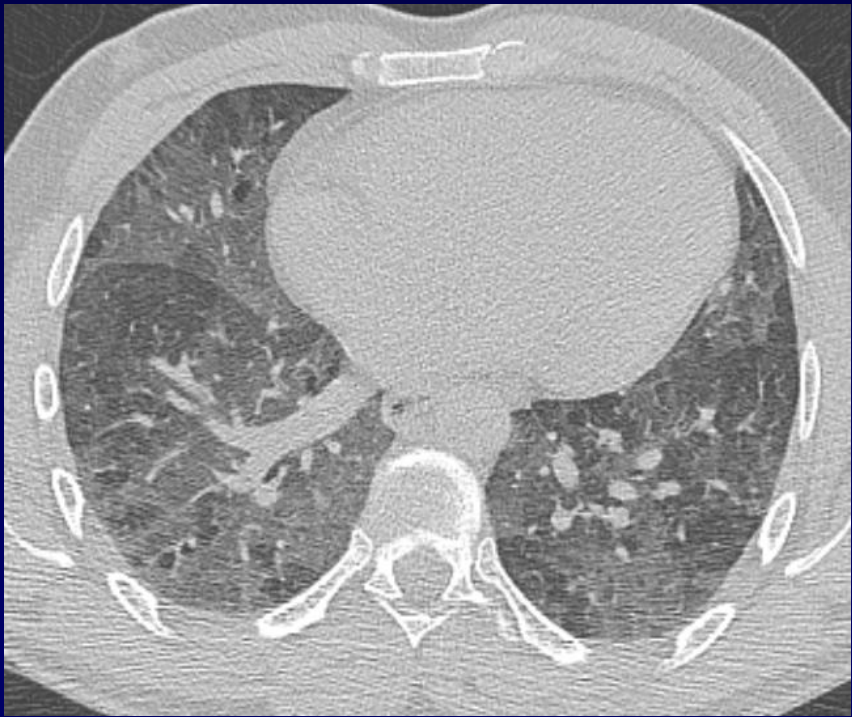

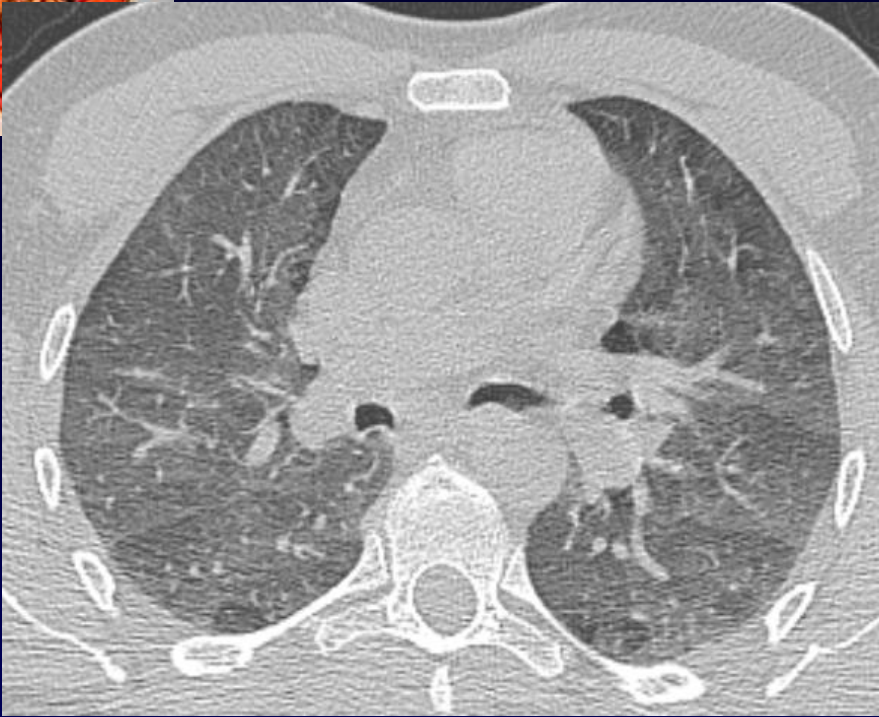

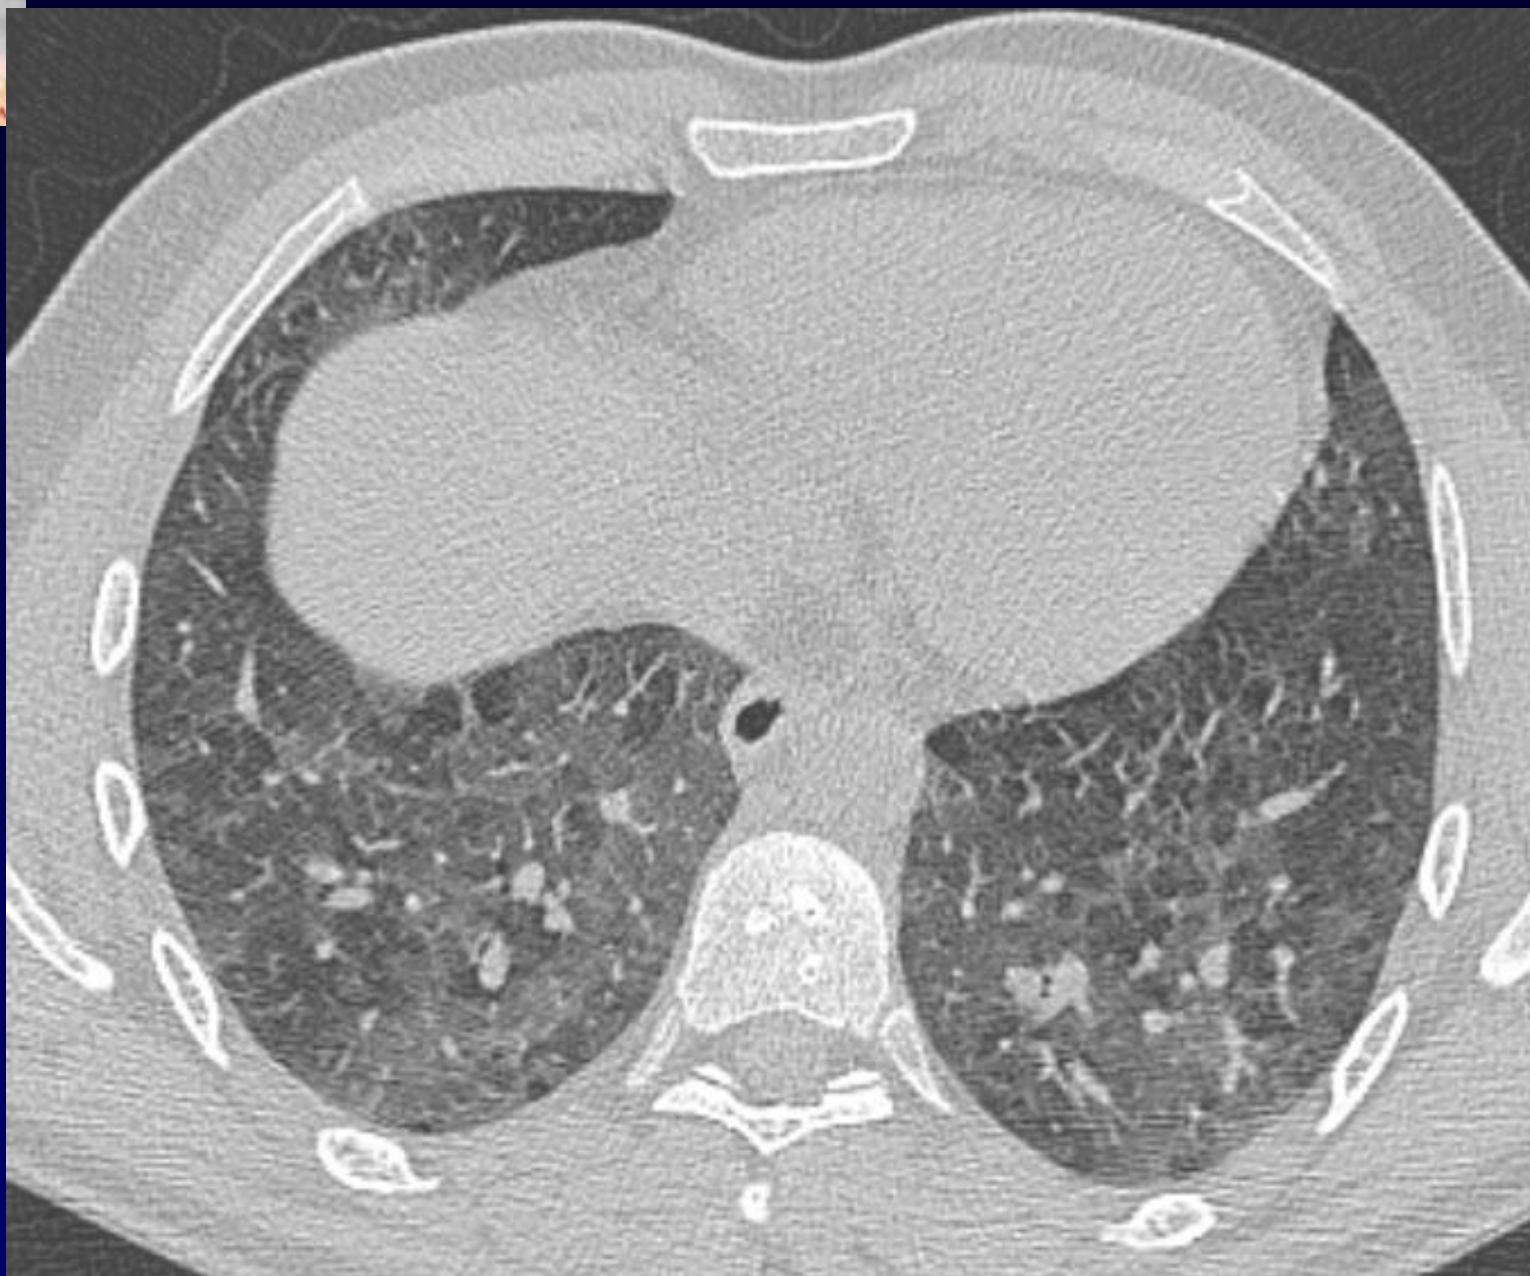

Diagnostic ?

Acquisition en expiration ...

minimip

Coro minimip

Diagnostic ?

Poumon de fermier

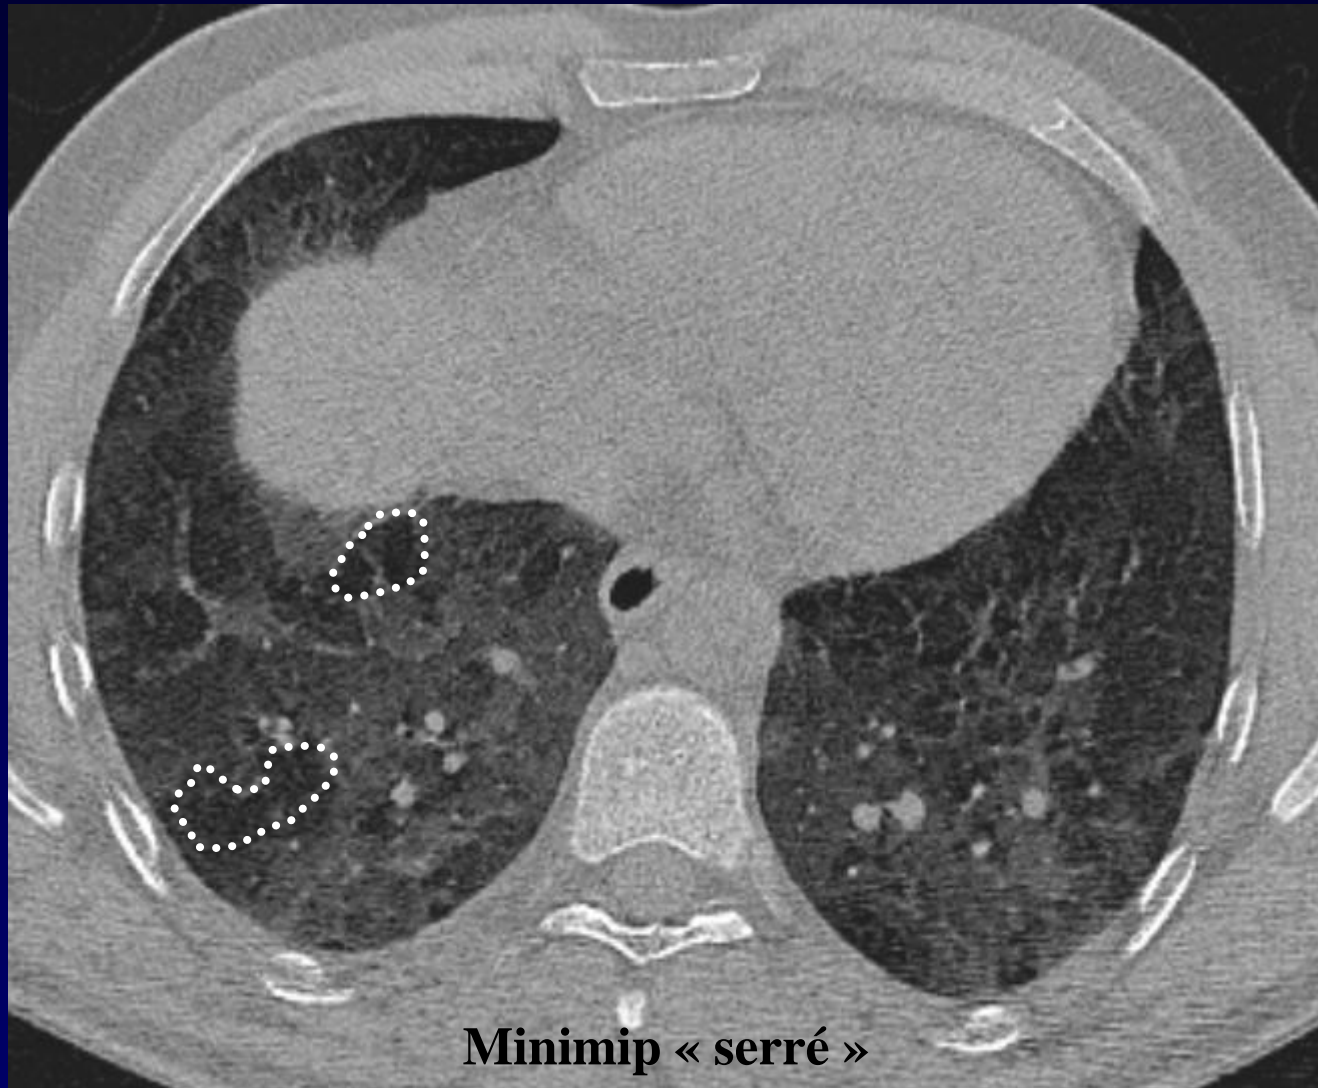

(sérologie positive à *Micropolyspora Faeni* ; 4 arcs)

Intérêt de savoir ce qu'on cherche :

- pour faire une *acquisition en EXPIRATION*
- qui permet de mettre en évidence un *trappage*

Trappage (lobules secondaires clairs)

Minimip « serré »
